

3rd Grade Unit 6

ELA and Math Objectives

ELA:

1. Students will be able to determine the central message of a myth.
2. Students will be able to interpret how a character's traits, motivations, and feelings lead to actions.
3. Students will be able to compare and contrast the setting in stories written by the same author about the same or similar characters.
4. Students will be able to explain how the key details in a text support the main idea.
5. Students will be able to locate cause and effect relationships within a text and correctly identify the causes and effects.
6. Students will be able to compare and contrast the key details in two different texts on the same topic.

3rd Grade Family Guide Pages: 7, 8, 11, 12, and 16

MATH:

1. Students will be able to know what the numbers in a division problem represent.
2. Students will be able to explain what division means and how it relates to equal share.
3. Students will be able to interpret quotients as the number of shares or the number of groups when a set of objects is divided equally.
4. Students will be able to divide within 100.
5. Students will be able to represent a word problem using a picture, and an equation with a symbol for the unknown number.

6. Students will be able to identify the unknown factor in the related multiplication problem.
7. Students will be able to use multiplication to solve division problems.

3rd Grade Family Guide Pages: 23, 24, 25, and 26
